

Date:

Contractor:

Project:

Bilco Brick Corporation certifies that our manufactured concrete masonry units comply with the following ASTM designations:

- 1) ASTM C90-16a Standard specification for Loadbearing Concrete Masonry Units
- 2) ASTM C-129-17 Standard specification for Nonloadbearing Concrete Masonry Units
- 3) ASTM C55-17 Standard specification for Concrete Building Brick

Aggregates used in manufacturing conform to:

- 1) ASTM C33-18 Standard specification for Concrete Aggregates
- 2) ASTM C331-17 Standard specification for Lightweight Aggregates for Concrete Masonry Units
- 3) ASTM C150-18 Standard specification for Portland Cement

Our concrete masonry units are tested in accordance to:

- 1) ASTM C140-17a Standard Test Methods for Testing Concrete Masonry Units

If requested, Bilco Brick Corporation can add Eucon Blocktite into the concrete masonry units. Eucon Blocktite is an integral water repellent which helps to prevent moisture migration in a concrete masonry wall. We also highly recommend using Eucon Blocktite Mortar Admixture in the mortar to obtain the same results.

Sincerely,

BILCO BRICK CORPORATION
