I. Manufacturer
Bilco Brick Corporation
P.O. Box 430
Lancaster, Texas 75146
Phone (972) 227-3380
Fax (972) 227-3384

II. Product Information
Product Name: Concrete Veneer Brick
Chemical Name: Mixture
Chemical Family: Majority Crystalline Silica
Formula: Mixture

III. Principal Ingredients

<table>
<thead>
<tr>
<th>Common Name</th>

</tbody>
</table>

IV. Physical Properties of Bilco Brick
Physical Form: Solid rectangular
Color: Various
Odor: Odorless
Solubility in Water: Negligible
Specific Gravity: 0.08 lbf/in3
Reactivity in Water: None
Bulk Density: N/A
Vapor Pressure: N/A
Percent Volatile By Volume: N/A
Vapor Density: N/A
Evaporation Rate: N/A
P.H.: N/A

VI. Health Hazard Information

Primary Routes of Entry
Dust from sawing brick can enter the body through the eyes and nasal passages.

Potential Health Effects
ACUTE EXPOSURE: Breathing dust caused by cutting the brick with a saw blade may cause nose, throat, respiratory, or lung irritation and choking. The dust may cause mild to severe irritation to the eyes by abrasion with dust or chips. The dust or chips may cause allergic reactions or abrasions if it comes into contact with skin. The described effect depends on the degree of exposure.

CHRONIC EXPOSURE: Prolonged or repeated exposure may cause lung injury. This dust contains Portland cement that can cause inflammation of the lining tissue of the interior of the nose and inflammation of the cornea. Individuals who are allergic to chromium may develop an allergic dermatitis. This dust also contains crystalline silica. Prolonged exposure to crystalline silica has caused cancer in laboratory animals. Some human studies indicate potential lung cancer from crystalline silica exposure. Risk of injury depends on duration and level of exposure.

Medical Conditions Aggravated by Exposure
Prolonged brick dust exposure may aggravate any existing respiratory disorders or diseases. Possible complications of allergies resulting in irritation to skin, eyes and respiratory passages may occur from excessive exposure to brick dusts.

VII. Emergency First Aid Procedures
Irrigate (flood) eyes immediately and repeatedly with clear water. Wash exposed skin areas with soap and water. If the product is swallowed, seek medical attention immediately. If inhalation causes irritation or breathing problems, remove from exposure to airborne particulate. If the irritation to eyes, skin and/or respiratory systems continues, consult a physician.

continued on page 3
VIII. Personal Protection Recommendations

**Eye Protection Requirement**
Tight fitting safety goggles to prevent contact with the eyes.

**Skin Protection Requirement**
Impervious gloves, clothes, and shoes to protect the skin.

**Respirator Protection Requirements**
When concentrations of sawdust from brick exceed the OSHA PEL or ACGIH TLV, a NIOSH/MSHA approved dust respirator should be worn.

**Ventilation Protection Requirements**
Use adequate ventilation to maintain exposure below the OSHA PEL and ACGIH TLV when sawing brick.

**Other Protection Requirements**
Wear safety shoes with steel toes.
A wet saw is recommended for cutting brick.

IX. Stability and Reactivity

**General:**
Product is stable

**Incompatible Materials and Conditions to Avoid:**
None

**Hazardous Decomposition:**
None, solid

X. Carcinogenicity

NTP and OSHA do not include this material, or its components, in their carcinogen listings. IARC has classed crystalline silica (quartz) as a probable human carcinogen.
